

Jacob Hartzler

MEEN Sophomore

- After graduation, I would like to continue A&M's fast track graduate school program and then go into industry afterwards.
- I have reasonable programming experience, first learning in high school. I was a software developer at NXP semiconductors this past summer and I currently do research in both the department of Mathematics and Aerospace Engineering. I have experience in Python, C++, MatLab, and LabVIEW.
- Learning Goals:
 1. Further Develop programming experience
 2. Solidify knowledge of differential equations and numerical solutions
 3. Develop a deep understanding of how numerical methods operate and feel confident in being able to apply this learning in industry.
